

Solid Acrylic Resin

Water-based WS8675

Appearance: Transparent Solid

Type: WS8675

Application: Water-based Acrylic Resin Solid is especially for producing water-based printing ink, overprint varnish and synthetic emulsion.

Specifications

Type NO.	WS8675
Solid Content (%)	99min
Acid number (mg KOH/g)	210-240
Softening Point (°C)	145-165
Average Molecular Weight	5000-7000
Temperature of glass transition(°C)	103

Characteristic:

- Excellent glosses
- Abrasive resistance
- Good solubility
- High transparency
- Good printability
- Good transitivity

Packing: In 25kgs compound bag, 600kgs/pallets

Quantity: Around 14mts/20'fcl without pallet or 12mts/20'fcl with pallet.

Storage: Keep in cool, dry place with ventilation equipment, far away from high temperature and sunshine

Shelf life: Within 12 months.
